## Ivy Solid Waste and Recycling Center

At the RSWA Board of Directors meeting on July 23<sup>rd</sup>, the Board voted to change the name of the Ivy Material Utilization Center to the Ivy Solid Waste & Recycling Center (ISW & RC). One of the goals of our 2023 Strategic Plan is to share our public-facing brand identity and we wanted to change the name to one that better communicated all the services we provide to the public, which include a refuse and construction debris transfer program, a recycling convenience center, and a vegetative debris and mulching program. We will also be constructing a new recycling materials baling facility at the ISW & RC in 2025. Our employees suggested many new names and we presented the top three to the Board, from which the Board chose the **Ivy Solid Waste & Recycling Center**.
